

# INVITATION TO PARTICIPATE

## CONSERVATIVE VS. LIBERAL: WHICH ONE IS BETTER?

1

### PURPOSE

This study compares two oxygen treatments for ventilated ICU patients, one gives more oxygen (liberal), the other gives just enough (conservative), to see which helps more people survive. **Your doctor has approved your family member's involvement in the trial.**

2

### BENEFITS

Study patients are more likely to receive the best treatment and survive because of learning from past participants

3

### RIGHTS

Participation is voluntary, and you or your family member can stop at any time without needing to explain. Your personal information will stay private.

4

### RISKS

No extra risk posed beyond standard ICU protocols.

5

### DATA COLLECTION

All needed information is collected during regular ICU care, with no extra check-ups. Participants will get one follow-up phone call after 3 months.

**WE UNDERSTAND THAT YOU MAY BE DISTRESSED  
BUT YOU CAN STILL HELP OTHERS.**
